

STORAGE RACKS

Metro Structural & Industrial Steelworks Corporation (MSISC) provides US standard high quality/heavy duty storage racking systems fabricated locally in Laguna International & Industrial Park, Mamlasan, Biñan, Laguna. Compared to competitor's light gauge imported racking systems, MSISC systems provide lifetime durability as well as quick expansion flexibility.

HEAVY DUTY RACKING

DRIVE-IN RACKS

SELECTIVE RACKS

RACK SUPPORTED MEZZANINE

LONGSPAN RACKS

RACKS WITH GANGWAY

CANTILEVER RACKS

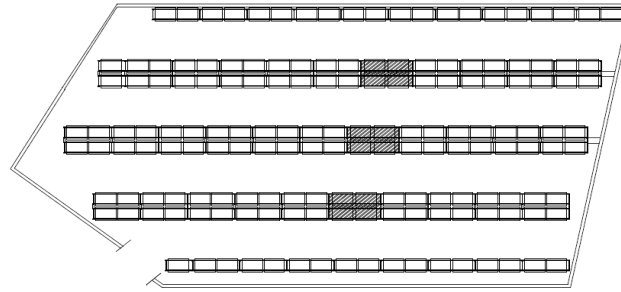

TIRE RACKS

CUSTOMIZED RACKS

CUSTOMIZED STORAGE RACKING SYSTEM DESIGN

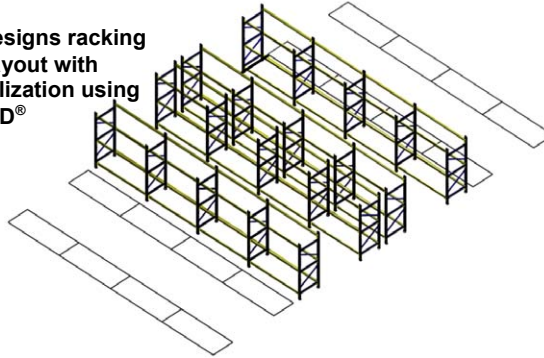

STEP 1: CLIENT FACILITY LAYOUT AND REQUIREMENTS

STAINLESS STEEL SILO FRAME

SPACE & ELEVATOR FRAME

TAPERED & CURVED BEAMS

LIGHT DUTY RACKS & STRUCTURAL

SLOTTED SHELVING

TEARDROP SHELVING

CURVED STEEL STAIR

GONDOLA SHELVING

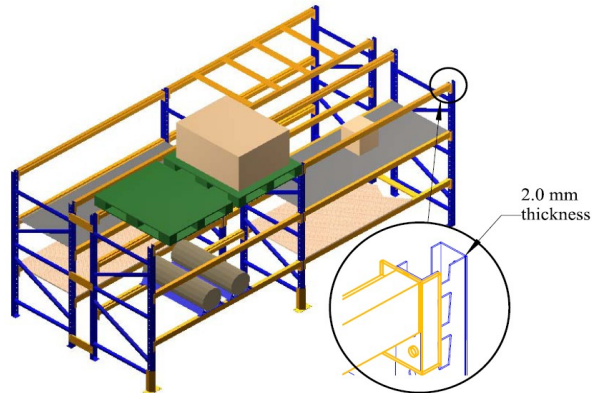

COMPANY HISTORY

Metro Structural & Industrial Steelworks Corporation (MSISC) was formerly a division of **Metro Construction Incorporated (MCI)**. Initially, its primary purpose was to serve the structural and miscellaneous steelworks requirements of MCI. As the group saw the growing market demand for high quality steel products in the country, MSISC was formed in 1993.

Equipped with modern plant facilities and equipment acquired from the United States and supported with professional engineering staff and shop personnel trained by American consultants, MSISC produces high quality steel products and structures.

INDUSTRIAL HEAVY DUTY GAUGE

DURABILITY IS THE DIFFERENCE

10 to 20% thicker than competitor's sections provides for lifetime durability

- Rated for seismic loading
- Lifetime durability and higher load capacities
- Section is more robust as compared to bolted rack (imported racks come in bolted sections shipped that are less durable)
- Welded connections that provides higher capacity and impact resistance
- Lower installation costs
- Higher resale value
- Adjustable beam levels
- Powder coated finish
